CONTENTS OF VOLUME 15

Number 1

C. Simpson and D. G. De Paor — 1 — Strain and kinematic analysis in general shear zones

L. L. Pryer — 21 — Microstructures in feldspars from a major crustal thrust zone: the Grenville Front, Ontario, Canada

R. Westaway — 37 — Neogene evolution of the Denizli region of western Turkey

W. T. Pratt and W. R. Fitches — 55 — Transected folds from the western part of the Bala Lineament, Wales

F. Bastida — 69 — A new method for the geometrical classification of large data sets of folds

K. M. Cruikshank and A. M. Johnson — 79 — High-amplitude folding of linear-viscous multilayers

S. K. Ghosh, N. Mandal, S. Sengupta, S. K. Deb and D. Khan — 95 — Superposed buckling in multilayers

Brevia

C. Richter, B. A. van der Pluijm and B. A. Housen — 113 — The quantification of crystallographic preferred orientation using magnetic anisotropy

117 — Book Reviews

I — International Newsletter 5: January 1993

Number 2

R. H. Sibson — 123 — Load-strengthening versus load-weakening faulting

S. Wu — 129 — Microstructures, deformation mechanisms and strain patterns in a vertical profile, inner Appalachian fold–thrust belt, Alabama

K. Kimura and R. Hori — 145 — Offscraping accretion of Jurassic chert–clastic complexes in the Mino–Tamba Belt, central Japan

H. A. Jelsma, P. A. van der Beek and M. L. Vinyu — 163 — Tectonic evolution of the Bindura–Shamva greenstone belt (northern Zimbabwe): progressive deformation around diapiric batholiths

G. Guglielmo, Jr — 177 — Magmatic strains and foliation triple points of the Merrimac plutons, northern Sierra Nevada, California: implications for pluton emplacement and timing of subduction

S. R. Paterson and T. K. Fowler, Jr — 191 — Re-examining pluton emplacement processes

R. T. Chen — 207 — Strain factorization by identical finite increments and its use

Wang Chong — 219 — The extremum rule of angular variation of finite deformation and its application in structural geology

Brevia

R. F. Weinberg — 227 — Drops, surface tension and diapir models

J. M. CRESPI 233 Inclined layer-silicate microstructures and their use as a sense-of-slip indicator for brittle fault zones

F. ROBERT 239 The geometrical relationship between the stretching lineation and the movement direction of shear zones: Discussion

S. LIN and P. F. WILLIAMS 241 The geometrical relationship between the stretching lineation and the movement direction of shear zones: Reply

Numbers 3–5

Special Issue: The Geometry of Naturally Deformed Rocks

v Preface

Folding

I. S. ZAGORČEV 243 The geometrical classification of folds and distribution of fold types in natural rocks

P. J. HUDLESTON and L. LAN 253 Information from fold shapes

Y. ZHANG, B. E. HOBBS and M. W. JESSELL 265 Crystallographic preferred orientation development in a buckled single layer: a computer simulation

S. MAZZOLI and S. CARNEMOLLA 277 Effects of the superposition of compaction and tectonic strain during folding of a multilayer sequence—model and observations

D. GRUJIĆ 293 The influence of initial fold geometry on Type 1 and Type 2 interference patterns: an experimental approach

D. MUKHOPADHYAY and A. MATIN 309 The structural anatomy of the Sandur schist belt—a greenstone belt in the Dharwar craton of South India

Fracture

A. L. THOMAS and D. D. POLLARD 323 The geometry of echelon fractures in rock: implications from laboratory and numerical experiments

A. J. WATKINSON 335 A footwall system of faults associated with a foreland thrust in Montana

Deformation mechanisms and fabrics

W. D. MEANS 343 Elementary geometry of deformation processes

M. BURKHARD 351 Calcite twins, their geometry, appearance and significance as stress–strain markers and indicators of tectonic regime: a review

R. PANOZZO HEILBRONNER and C. PAULI 369 Integrated spatial and orientation analysis of quartz *c*-axes by computer-aided microscopy

G. J. BORRADAILE 383 Strain and magnetic remanence

Displacement, strain and progressive deformation

J.-P. GRATIER and B. GUILLIER 391 Compatibility constraints on folded and faulted strata and calculation of total displacement using computational restoration (UNFOLD program)

P. D. Bons, M. W. Jessell and C. W. Passchier — 403 The analysis of progressive deformation in rock analogues

H. Fossen and B. Tikoff — 413 The deformation matrix for simultaneous simple shearing, pure shearing and volume change, and its application to transpression–transtension tectonics

S. H. Treagus — 423 Flow variations in power-law multilayers: implications for competence contrasts in rocks

Deformation in fold and thrust belts

M. B. Gray and G. Mitra — 435 Migration of deformation fronts during progressive deformation: evidence from detailed structural studies in the Pennsylvania Anthracite region, U.S.A.

B. A. Couzens, W. M. Dunne, C. M. Onasch and R. Glass — 451 Strain variations and three-dimensional strain factorization at the transition from the southern to the central Appalachians

C. M. Onasch and W. M. Dunne — 465 Variation in quartz arenite deformation mechanisms between a roof sequence and duplexes

W. H. Lickorish — 477 Structural evolution of the Porcupine Creek anticlinorium, Western Main Ranges, Rocky Mountains, British Columbia

J. W. Cosgrove — 491 The interplay between fluids, folds and thrusts during the deformation of a sedimentary succession

Alpine structure and tectonics

A. Escher, H. Masson and A. Steck — 501 Nappe geometry in the Western Swiss Alps

O. A. Pfiffner — 511 The structure of the Helvetic nappes and its relation to the mechanical stratigraphy

D. A. Ferrill and R. H. Groshong, Jr — 523 Kinematic model for the curvature of the northern Subalpine Chain, France

T. Baudin, D. Marquer and F. Persoz — 543 Basement–cover relationships in the Tambo nappe (Central Alps, Switzerland): geometry, structure and kinematics

A. Jabaloy, J. Galindo-Zaldívar and F. González-Lodeiro — 555 The Alpujárride–Nevado-Fibábride extensional shear zone, Betic Cordillera, SE Spain

E. R. Schermer — 571 Geometry and kinematics of continental basement deformation during the Alpine orogeny, Mt. Olympos region, Greece

Pluton emplacement

G. Guglielmo, Jr — 593 Interference between pluton expansion and non-coaxial tectonic deformation: three-dimensional computer model and field implications

O. T. Tobisch, P. R. Renne and J. B. Saleeby — 609 Deformation resulting from regional extension during pluton ascent and emplacement, central Sierra Nevada, California

Structure of the middle and lower crust

J. A. Gilotti and J. M. Hull — 629 Kinematic stratification in the hinterland of the central Scandinavian Caledonides

E. H. Rutter, K. H. Brodie and P. J. Evans — 647 Structural geometry, lower crustal magmatic underplating and lithospheric stretching in the Ivrea–Verbano zone, northern Italy

R. SHACKLETON 663 Tectonics of the lower crust: a view from the Usambara Mountains, NE Tanzania

Number 6

673 Editorial

R. LACASSIN, P. H. LELOUP and P. TAPPONNIER 677 Bounds on strain in large Tertiary shear zones of SE Asia from boudinage restoration

A. K. KHUDOLEY 693 Structural and strain analyses of the middle part of the Talassian Alatau ridge (Middle Asia, Kirgizstan)

A. YIN and G. OERTEL 707 Kinematics and strain distribution of a thrust-related fold system in the Lewis thrust plate, northwestern Montana (U.S.A.)

P. A. ARMSTRONG and J. M. BARTLEY 721 Displacement and deformation associated with a lateral thrust termination, southern Golden Gate Range, southern Nevada, U.S.A.

M. R. GROSS 737 The origin and spacing of cross joints: examples from the Monterey Formation, Santa Barbara Coastline, California

R. WESTAWAY and N. KUSZNIR 753 Fault and bed 'rotation' during continental extension: block rotation or vertical shear?

T. T. CLADOUHOS and R. W. ALLMENDINGER 771 Finite strain and rotation from fault-slip data

A. NICOL 785 Conical folds produced by dome and basin fold interference and their application to determining strain: examples from North Canterbury, New Zealand

D. MAINPRICE, J.-L. BOUCHEZ, M. CASEY and P. DERVIN 793 Quantitative texture analysis of naturally deformed anhydrite by neutron diffraction texture goniometry

Brevia

M. A. MCNAUGHT and G. MITRA 805 A kinematic model for the origin of footwall synclines

809 Book Reviews

817 Correction

Number 7

J. ZHANG, D. M. DAVIS and T.-F. WONG 819 The brittle–ductile transition in porous sedimentary rocks: geological implications for accretionary wedge aseismicity

K. M. BROWN and D. L. ORANGE 831 Structural aspects of diapiric mélange emplacement: the Duck Creek Diapir

J. NEWMAN and G. MITRA 849 Lateral variations in mylonite zone thickness as influenced by fluid–rock interactions, Linville Falls fault, North Carolina

K. KANAGAWA 865 Competence contrasts in ductile deformation as illustrated from naturally deformed chert–mudstone layers

G. J. Borradaile and J. F. Dehls — 887 Regional kinematics inferred from magnetic subfabrics in Archean rocks of Northern Ontario, Canada

C. W. Passchier and D. Sokoutis — 895 Experimental modelling of mantled porphyroclasts

R. Weijermars — 911 Progressive deformation of single layers under constantly oriented boundary stresses

W. C. Haneberg — 923 Drape folding of compressible elastic layers—II. Matrix solution for two-layer folds

Brevia

K. S. Dueholm, A. A. Garde and A. K. Pedersen — 933 Preparation of accurate geological and structural maps, cross-sections or block diagrams from colour slides, using multi-model photogrammetry

S. Mazzoli — 939 A graphical representation of coaxial plane strains and volume changes

943 Book Reviews

I International Newsletter 6: July 1993

Number 8

A. J. Maltman, T. Byrne, D. E. Karig and S. Lallemant — 949 Deformation at the toe of an active accretionary prism: synopsis of results from ODP Leg 131, Nankai, SW Japan

C. Henry, A. Michard and C. Chopin — 965 Geometry and structural evolution of ultra-high-pressure and high-pressure rocks from the Dora-Maira massif, Western Alps, Italy

J. W. Mies — 983 Structural analysis of sheath folds in the Sylacauga Marble Group, Talladega slate belt, southern Appalachians

D. A. Ferrill and R. H. Groshong, Jr — 995 Deformation conditions in the northern Subalpine Chain, France, estimated from deformation modes in coarse-grained limestone

J. P. Bloomfield and S. J. Covey-Crump — 1007 Correlating mechanical data with microstructural observations in deformation experiments on synthetic two-phase aggregates

H. Tanaka and Y. Saka — 1021 Block rotation by basement strike-slip faulting in the Sanchu graben, central Japan

J.-M. Dupin, W. Sassi and J. Angelier — 1033 Homogeneous stress hypothesis and actual fault slip: a distinct element analysis

D. D. Pollard, S. D. Saltzer and A. M. Rubin — 1045 Stress inversion methods: are they based on faulty assumptions?

Brevia

R. L. M. Vissers — 1055 Quartz *c*-axis fabrics in deformed conglomerates: some support for a skeletal approach to fabric analysis

Numbers 9–10

Special Issue: Microstructures and Rheology of Rocks and Rock-forming Minerals

	v	Preface
V. M. Mares and A. K. Kronenberg	1061	Experimental deformation of muscovite
R. Christoffersen and A. K. Kronenberg	1077	Dislocation interactions in experimentally deformed biotite
W. T. Shea, Jr and A. K. Kronenberg	1097	Strength and anisotropy of foliated rocks with varied mica contents
D. W. Baker, K. S. Chawla and R. J. Krizek	1123	Compaction fabrics of pelites: experimental consolidation of kaolinite and implications for analysis of strain in slate
A. J. Gratz and J. M. Christie	1139	Recrystallization at grain contacts in a sandy siltstone
G. C. Gleason, J. Tullis and F. Heidelbach	1145	The role of dynamic recrystallization in the development of lattice preferred orientations in experimentally deformed quartz aggregates
D. Mainprice, G. E. Lloyd and M. Casey	1169	Individual orientation measurements in quartz polycrystals: advantages and limitations for texture and petrophysical property determinations
B. G. Erskine, F. Heidelbach and H.-R. Wenk	1189	Lattice preferred orientations and microstructures of deformed Cordilleran marbles: correlation of shear indicators and determination of strain path
B. R. Hacker and S. H. Kirby	1207	High-pressure deformation of calcite marble and its transformation to aragonite under non-hydrostatic conditions
S. H. Kirby and L. A. Stern	1223	Experimental dynamic metamorphism of mineral single crystals
R. C. First and A. H. Heuer	1241	Deformation by moving interfaces (deformation twinning) in monoclinic zirconia (Baddeleyite)
T. N. Tingle, H. W. Green, II, C. H. Scholz and T. A. Koczynski	1249	The rheology of faults triggered by the olivine–spinel transformation in Mg_2GeO_4 and its implications for the mechanism of deep-focus earthquakes
N. L. Carter, S. T. Horseman, J. E. Russell and J. Handin	1257	Rheology of rocksalt

Number 11

G. Suhr	1273	Evaluation of upper mantle microstructures in the Table Mountain massif (Bay of Islands ophiolite)
J.-P. Burg and O. Vanderhaeghe	1293	Structures and way-up criteria in migmatites, with application to the Velay dome (French Massif Central)
A. Miyake	1303	Rotation of biotite porphyroblasts in pelitic schist from the Nukata area, central Japan
A. Taboada	1315	Stress and strain from striated pebbles. Theoretical analysis of striations on a rigid spherical body linked to a symmetrical tensor
J. H. Howard	1331	Restoration of cross-sections through unfaulted, variably strained strata

O. R. CLAUSEN and J. A. KORSTGÅRD 1343 Small-scale faulting as an indicator of deformation mechanism in the Tertiary sediments of the northern Danish Central Trough

Brevia

D. M. RAGAN and R. H. GROSHONG, JR 1359 Strain from two angles of shear

J. SELLÉS-MARTÍNEZ 1361 A common misinterpretation of the equal-area net properties

A. FORDE and T. H. BELL 1365 The rotation of garnet porphyroblasts around a single fold, Lukmanier Pass, Central Alps: Discussion

N. S. MANCKTELOW and P. VISSER 1369 The rotation of garnet porphyroblasts around a single fold, Lukmanier Pass, Central Alps: Reply

J. P. MILANA and J. J. ZAMBRANO 1373 Structural evolution of the Argentine Precordillera—the Rio San Juan section: Discussion

W. VON GOSEN 1377 Structural evolution of the Argentine Precordillera—the Rio San Juan section: Reply

T. B. ANDERSEN 1379 The role of extensional tectonics in the Caledonides of south Norway: Discussion

H. FOSSEN 1381 The role of extensional tectonics in the Caledonides of south Norway: Reply

1385 Book Reviews

1391 Correction

Number 12

J. F. M. HIPPERTT 1393 'V'-pull-apart microstructures: a new shear-sense indicator

J. ALLER and F. BASTIDA 1405 Anatomy of the Mondoñedo Nappe basal shear zone (NW Spain)

K. MICHIBAYASHI and T. MASUDA 1421 Shearing during progressive retrogression in granitoids: abrupt grain size reduction of quartz at the plastic–brittle transition for feldspar

C. R. WALCOTT and D. CRAW 1433 Subsolidus physical and chemical mixing of granite and gabbro during mylonitization, South Victoria Land, Antarctica

E. W. SAWYER and K. BENN 1443 Structure of the high-grade Opatica Belt and adjacent low-grade Abitibi Subprovince, Canada: an Archaean mountain front

D. AVIGAD 1459 Tectonic juxtaposition of blueschists and greenschists in Sifnos Island (Aegean Sea)—implications for the structure of the Cycladic blueschist belt

X. Q. MA and N. J. KUSZNIR 1471 Modelling of near-field subsurface displacements for generalized faults and fault arrays

C. G. HATTON, I. G. MAIN and P. G. MEREDITH 1485 A comparison of seismic and structural measurements of scaling exponents during tensile subcritical crack growth

S. WU 1497 Fractal strain distribution and its implications for cross-section balancing

Brevia

J. J. WALSH and J. WATTERSON 1509 Fractal analysis of fracture patterns using the standard box-counting technique: valid and invalid methodologies

D. C. P. PEACOCK and D. J. SANDERSON 1513 Estimating strain from fault slip using a line sample
